

WHERE DOES OUR WASTE GO?

Waste collected through the Fleurieu Regional Waste Authority (FRWA) kerbside system and at Waste and Recycling Depot (WRD) or Kangaroo Island Resource Recovery Centre (KIRRC) is currently managed as follows:-

- **General waste goes to landfill** – either Southern Region Waste Resource Authority (SRWRA), at Pedler Creek or Brinkley Waste and Recycling Facility (operated by Adelaide Hills Waste Management Authority) both sites are EPA licensed and complying landfills in South Australia
- **Kerbside collected recyclables** are being delivered to SKM facilities in South Australia, which are also SA EPA licensed facilities
- **Green organic waste** is processed by FRWA on three FRWA sites and offered back to communities as mulch. Green organic waste from District Council of Yankalilla is currently sent to Peat's Soil and Garden.

OTHER RECYCLABLES ARE MANAGED

MATERIAL	MANAGEMENT	WEBSITES
10 cents drink containers	Local CDL depots	www.southcoastrecycle.com.au
Construction and demolition waste (inert)	Periodic crushing into road base at the Goolwa WRD	
Waste Oil	Collected in waste oil stations at WRDs and periodically picked up by licenced operator for recycle in SA	
Scrap metal and e-waste not covered under the National Scheme	Sold to SA merchants for recycling	
e-waste covered under the National Scheme	Managed through an Approved Arrangement under the National TV and Computer Recycling Stream and processed in SA.	www.techcollect.com.au/where-does-our-e-waste-go
Paper and cardboard	SKM facilities in SA. Orora facilities in SA	www.skmrecycling.com and www.ororagroup.com
Tyres	Periodically picked up by Tyre Cycle (SA company) for processing	www.tyrecycle.com.au
Mobile phones	Mobile Muster	www.mobilemuster.com.au
X-Rays	Periodically picked up from WRDs by CMA Recycling	www.cmaecocycle.net
Light globes, fluorescent tubes	Periodically picked up from WRDs by CMA Recycling	www.cmaecocycle.net
Mattresses	Stripped at WRDs, springs recycled as scrap metal, fabric to landfill	

The State Government in South Australia, through the EPA, have regulations and powers on how waste must be managed which includes penalties for improper management, including of illegal dumping. The key document that governs our day-to day operations is the Environment Protection (Waste to Resources) Policy 2010 states that it is an offence to dispose of materials that have been collected for recycling.

The Fleurieu Regional Waste Authority is an entity formed by its four member councils and is responsible for kerbside waste collection, the operation of four (4) Waste and Recycling Depots and provision of waste education for member councils. **FRWA's operations are in compliance with legislative requirements.** Materials segregated for recycling are being processed at our worksites or picked up by or delivered to companies that are licensed to process those materials.

FRWA has no contracts with Bingo (company mentioned in ABC War on Waste 2017). FRWA engages Cleanaway's grinding services from time to time for greenwaste stockpiled at FRWA's Waste and Recycling Depot which is subject to periodic grinding campaigns at our worksites.
