WORKS & INFRASTRUCTURE UPDATES

Freycinet Way Penneshaw – CWMS (Community Wastewater Management System) – update

Works continue along Freycinet Way to install the CWMS infrastructure. It is anticipated that these construction activities will be completed within the month of July.

Some temporary reinstatement to road surfaces will initially be undertaken. The intent is for a more permanent solution for the road surfaces to be installed as a separate project when weather and temperature conditions are appropriate. It is expected that this activity will occur in September or October when it warms up.

While the current works are being carried out please observe the directions of traffic controllers and signage.

Pennington Bay Steps

The contractor is expecting to take delivery of the lower stair components this week. Assembly of the last section of this beach access is scheduled to be completed by the end of July.
